

LegalEase: AI-Powered Legal Document Generator

Phase 1 – Brainstorming and Ideation

Prepared by: M. Poornima

Class: II BCA

Institution: S.S.K.V College of Arts and Science for Women

Date: 24.09.2026

Prepared for: Dr. V. Priya

Phase Overview

LegalEase is an educational software project that uses guided forms, templates, and AI-assisted generation to help users prepare structured drafts of common legal documents. The concept focuses on reducing the difficulty of starting a document while keeping users responsible for reviewing the final content.

Problem Identification

- Legal-document formats can be difficult for beginners to understand.
- Starting from a blank page is time-consuming.
- Users may not know what basic information is needed for a particular document.

Target Users

- Students and learners studying document preparation.
- Individuals preparing structured drafts for common document categories.
- Small organizations and beginners needing guided drafting.

Proposed Solution

- Select a document category.
- Collect information through a guided form.
- Generate a structured draft using templates and AI assistance.
- Allow review, editing, preview, and export.

Key Features

- Document-type selection
- Guided input forms
- AI-assisted draft generation
- Template-based formatting
- Preview and editing

- PDF/DOCX export
- Document history where applicable

Expected Benefits

LegalEase can make drafting more organized and accessible for educational and general drafting purposes. Generated documents should be reviewed by a qualified legal professional before actual legal use.

Academic Project Note: LegalEase is an educational drafting prototype. AI-generated legal text should be treated as a draft and reviewed by a qualified legal professional before real-world legal use.
