

LegalEase: AI-Powered Legal Document Generator

Phase 7 – Project Documentation

Prepared by: M. Poornima

Class: II BCA

Institution: S.S.K.V College of Arts and Science for Women

Date: 24.09.2026

Prepared for: Dr. V. Priya

Phase Overview

This phase consolidates the complete project into an academic technical record.

Project Overview

LegalEase: AI-Powered Legal Document Generator is an educational application concept for guided creation of structured legal-document drafts using templates and AI-assisted generation.

Objectives and Scope

- Simplify document drafting through guided inputs.
- Provide structured templates.
- Use AI to assist with wording and organization.
- Support review, editing, and export.
- Keep the project suitable for an academic prototype.

Documentation Contents

- Introduction and problem statement
- Objectives
- Scope and limitations
- Requirement analysis
- System architecture
- Module descriptions
- Implementation approach
- Testing and results
- Screenshots and outputs
- Conclusion and future scope

User Guidelines

- Choose the correct document category.

- Enter accurate information.
- Avoid entering unnecessary confidential information in a prototype.
- Review all generated content.
- Export only after checking the document.
- Seek qualified legal advice for real legal matters.

Limitations

- AI can generate incorrect or incomplete content.
- Legal rules differ by jurisdiction.
- The prototype may support only selected document types.
- Professional legal review is outside the academic prototype.

Future Enhancements

- More document templates
- Jurisdiction-specific configuration
- Multilingual support
- Secure user accounts
- Version history
- Improved validation
- Professional review workflow
- Accessibility improvements
- Cloud storage and collaboration

Academic Project Note: LegalEase is an educational drafting prototype. AI-generated legal text should be treated as a draft and reviewed by a qualified legal professional before real-world legal use.
